PROFESSIONAL SUMMARY

IT Specialist / Systems Administrator with 4+ years of experience supporting enterprise networks, cybersecurity, systems administration, and end-user infrastructure across multiple locations. Hands-on experience with Cisco, HPE/Aruba, Ubiquiti, Palo Alto Networks, Microsoft Active Directory, Windows Server, Microsoft 365, VMware, CrowdStrike, Wazuh, and RADIUS/NPS. CompTIA Security+ and CySA+ certified with an Associate of Applied Science in Networking.

TECHNICAL SKILLS

Networking: Cisco, HPE/Aruba, Ubiquiti, Switching, VLANs, Wireless, TCP/IP, DNS, DHCP, RADIUS, 802.1X

Cybersecurity: Palo Alto Networks, Global Protect, CrowdStrike, Wazuh, Network Security, Endpoint Security, Authentication & Access Control, Security Monitoring

Systems: Active Directory, Windows Server, Group Policy, Microsoft 365, Exchange, Teams, OneDrive, VMware/vSphere, Linux, macOS

Infrastructure: Network Infrastructure, Wireless Access Points, NAS, Endpoint Administration, Hardware Installation & Troubleshooting

PROFESSIONAL EXPERIENCE

IT SPECIALIST / SYSTEMS ADMINISTRATOR

Rekord Tent LLC — Washington, GA | 4 Years

- Support and maintain enterprise network, systems, endpoints, and security infrastructure across multiple locations.
- Design, deploy, configure, and troubleshoot network infrastructure using Cisco, HPE/Aruba, and Ubiquiti technologies.
- Troubleshoot VLANs, switching, routing, wireless connectivity, DNS, DHCP, authentication, and network security issues.
- Administer and troubleshoot Active Directory, Windows Server, Group Policy, and domain-connected systems.
- Implement and troubleshoot RADIUS / NPS and 802.1X authentication for enterprise network access.
- Support Palo Alto Networks firewalls and GlobalProtect VPN, including connectivity and certificate-related troubleshooting.
- Deploy and support CrowdStrike endpoint security and assist with security configuration and troubleshooting.
- Utilize Wazuh for centralized logging, security monitoring, and infrastructure visibility.
- Support Microsoft 365, Exchange, Teams, OneDrive, and other enterprise applications.
- Administer and troubleshoot VMware virtual environments and Windows/Linux systems.
- Troubleshoot hardware, software, endpoint, network, and authentication issues while minimizing operational downtime.
- Implemented and managed the access control system and cameras for multiple locations.
- Maintain compliance with organizational information security policies and procedures.
